

Moni Kaur

Computer Science & Artificial Intelligence Undergraduate

Jaipur, Rajasthan, India | kaumoni0013@gmail.com | +91 967260324

github.com/kaumoni0013 | linkedin.com/in/kaumoni0013 | leetcode.com/u/kaumoni0013 | geeksforgeeks.org/user/kaumoni0013

PROFESSIONAL SUMMARY

B.Tech Computer Science & Artificial Intelligence undergraduate (expected 2028, CGPA 9.4/10) with a strong C++ and Data Structures & Algorithms foundation and hands-on full-stack MERN development. Built full-stack applications covering JWT authentication, concurrency-safe appointment booking with MongoDB indexes, Redis rate limiting and token quotas, and AI API integration with OpenRouter and Server-Sent Events. Looking for a Software Engineer or Full-Stack Developer internship.

EDUCATION

Arya College of Engineering & IT, Jaipur

Expected 2028

B.Tech — Computer Science & Artificial Intelligence | CGPA: **9.4/10**

Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Web Development, Compiler Design

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, SQL, HTML, CSS

Frontend: React.js, React Query

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Server-Sent Events (SSE)

Databases: MongoDB, Mongoose, Redis

AI / APIs: OpenRouter, AI API Integration

Tools: Git, GitHub, Docker, Linux, Postman, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

EXPERIENCE

GRRAS Solutions Pvt. Ltd. — Industrial Training, Full Stack Web Development (MERN)

Jaipur, Rajasthan | 2026

- Completed structured industrial training covering HTML, CSS, JavaScript, and MERN stack development with hands-on full-stack web application development.
- Developed Orbit AI as the assigned project, applying MERN training concepts across the frontend, backend, database, authentication, Redis, and AI API integration.

PROJECTS

MediQueue — Clinic Appointment & Queue Management System

GitHub | Live Demo

Tech Stack: MERN, MongoDB, React, Node.js, Express.js, JWT, React Query

- Built a MERN clinic management platform with separate Admin, Staff, Doctor, and Patient portals covering appointment booking, live queue tracking, rescheduling, and consultation workflows.
- Made booking race-safe using server-side slot validation and a partial unique MongoDB index, so two simultaneous requests cannot claim the same active slot.
- Enforced the appointment lifecycle on the server with a state machine (SCHEDULED → WAITING → IN_CONSULT → COMPLETED), role-based access control, per-record ownership checks, and JWT session revocation.
- Derived queue position and estimated wait time from queue state and consultation history, added rate limiting and hardened HTTP security headers, and wrote an end-to-end verification suite with **67/67 checks passing**.

Orbit AI — Full-Stack AI Conversation Workspace

GitHub

Tech Stack: React, Node.js, Express.js, MongoDB, Redis, OpenRouter, Docker

- Built a full-stack AI conversation workspace with persistent chats, conversation context, summarization, and model selection through OpenRouter.
- Implemented Redis-backed rate limiting (20 requests per minute per user) and token quotas using atomic quota reservations and expiring locks to prevent concurrent summary writes.
- Secured the app with cookie-based JWT authentication and server-side session revocation, and streamed AI responses over Server-Sent Events with abortable Stop and Retry handling.
- Hardened the service with provider timeouts and retries, model allowlisting, message validation, ownership checks, CORS and security headers, health and readiness endpoints, graceful shutdown, and MongoDB transactions; runs with Docker.

HACKATHONS & TECHNICAL ACTIVITIES

- Smart India Hackathon** — RailQR-Mark | Team participant; contributed to problem analysis, backend, APIs, and database development.
- HackNexus 2026** — Participant.

CERTIFICATIONS

- NPTEL — Programming in C++ (Elite)
- NPTEL — Programming in Java (Silver)
- NPTEL — Object-Oriented Programming (Silver)
- NPTEL — Data Structures & Algorithms (Completed)
